1 Mission Statement

Cascadia Supermoto exists to bring safe, friendly, competitive, and fun supermoto, minibike, and scooter racing back to the Pacific Northwest. It is Cascadia Supermoto's mission to provide a competitive racing program for riders of all skill levels, a fun and friendly series for spectators, and a high-visibility opportunity for vendors to participate in.

2 Event Schedule

2.1 Race Dates

Please see the schedule on the website at <http://cascadiasm.com/index.php/schedule/> for the latest information.

2.2 Practice dates

NEW RACER SCHOOL – Dates on Cascadia Website– TCKC, Richland, WA

For TCKC open practice dates, see the TCKC schedule at <http://tckc.net/my-calendar/>

Please see the schedule on the website at <http://cascadiasm.com/index.php/schedule/> for the latest information.

3 Cascadia Supermoto At A Glance

For details, please read the rest of the rulebook. For the impatient, the important facts:

3.1 How much does it cost?

Riders must be members of the club. Club memberships are available at any time during the season.

Advanced-purchase annual membership:	\$65
Annual membership:	\$100
Single-event membership:	\$30

Riders must also pay an entry fee for every event. After the first two classes, additional classes are FREE.

Entry fee for 1 st class:	\$80
Entry fee for 2 nd class:	\$35
Entry fee for additional classes:	FREE!

3.2 What motorcycle can I race?

Anything that is:

- A Supermoto, dual-sport, or off-road motorcycle. NO SPORT-BIKES, and nothing with more than two wheels.
- No more than two cylinders.
- Under 580cc if a twin-cylinder.
- Compliant with technical requirements in Section 5.1.

If your motorcycle meets these requirements, **we will find two classes for you to ride in, no matter what you bring.**

NOTE: If you want to race a larger-displacement dual-sport or supermoto, such as a KTM 990, Ducati Multistrada, Suzuki V-Strom, etc, exceptions can be made on a per-class and per-rider basis.

3.3 What are the classes?

- Open
- Intermediate
- Beginner
- 450
- 250/400
- 45+ Veteran
- 30+ Veteran
- Asphalt-only
- Mini

3.4 What do I need to do to my bike?

- Make sure it's in good condition generally, with no leaks, working controls, and road-worthy tires (NO knobbies, DOT dual sport tires okay).
- Install hand-guards, foot peg sliders, and axle sliders if you don't already have them.
- Install a metal or plastic catch can with the, carb drain/vent tubes, and oil breather lines routed there. Yes, soda cans are OK.
- Replace the glycol based coolant with distilled water and Water Wetter, VP Stay Frosty Race-Ready Coolant, or equivalent. **NO ENGINE ICE! NO GLYCOL COOLANT!**
- Safety wire the oil drain plug and external filter (if the bike has one).
- Safety wire or wire-and-R-clip the oil fill cap.
- Tighten and put a dab of silicone on oil filter cover bolts.
- Remove your mirrors, license plate, and kickstand.
- Tape up turn signals and taillights. If the headlight hasn't been removed, unplug it and tape it up.

3.5 What do I need for protection?

- A full face Snell 2010, BSI 6658-A, or ECE 22-05 helmet in good condition.

- Full-coverage (no skin showing) asphalt-focused protection (leather, cordura, etc), or armor underneath MX gear. Leathers are strongly recommended but not required.
- Good gloves, leather is recommended, no thin MX style gloves.
- Sturdy boots that cover the ankle. MX, road race, or Supermoto boots are strongly recommended.
- Enough gear that YOU feel comfortable sliding on asphalt at 70+mph.

4 Membership and entry fees

4.1 Annual membership

A Cascadia Supermoto membership is required in order to participate in Cascadia Supermoto events.

An **annual** membership can be purchased for **\$100** at any event. Membership prices will not be pro-rated, but may be waived on a case-by-case basis by race direction.

A **single-event** membership can be purchased for **\$20** at the event. The cost of a single-event membership can be applied towards an annual membership later in the year.

Annual members also benefit from special offers from vendors, including contingency money in some cases. Racers who purchase single-event memberships are not eligible for vendor offers or contingency money.

4.2 Race entry fees

Race entry requires a Cascadia Supermoto membership, either a single-event or annual membership. On race day, the fees are:

\$80 for the first class entered.

\$35 for the second class entered.

Any additional classes entered are **FREE!**

Failure to pay (bounced check, bad credit card, etc.) will result in suspension from the series until the owed fee is covered. If the unpaid fee is not resolved within 7 days of the event, results will be changed to DNS

4.3 Refunds

If a rider is **unable** to ride after signing up, a refund **may** be issued. If the rider enters the track for a practice, heat, or main, no refund will be given.

4.4 Rain or shine

Cascadia Supermoto will race RAIN OR SHINE unless race direction determines the track conditions to be unsafe for competition. If the track is deemed to be unsafe prior to the conclusion of the first set of heat races, all entries will be carried forward to the next event.

5 Classes

5.1 Restrictions for all classes

All classes have the following restrictions:

- No sport-bike-style motorcycles (i.e. fairings and clip-ons) except in the minibike and scooter classes.

5.1.1 Fuels

- Gasoline based fuels only, NO methanol, nitromethane, propane, etc. Blended ethanol fuel up to E85 is permitted. All fuels must be available for retail purchase in the USA.

5.1.2 Engines

- No turbocharging, supercharging, nitrous oxide, or other 'power adders' are permitted on any motorcycle.

5.1.3 Other

- All modifications must be performed in a safe, workmanlike manner. Any and all modifications must be determined safe by the technical inspector.

5.1.4 Electric Motorcycles

Electric motorcycles will be classed based on the following weight to power formula (measured wet, as published by the manufacturer or available via dyno chart):

- Electric motorcycles under 15hp may run in the mini class.
- 5.2 lb/hp and higher may run in the 250/400 class.
- 5.19 lb/hp and lower must run in the 450 and Open classes.

NOTE: If you have questions regarding the legality of any modification please ask the Board PRIOR to the race season. The series is a place for amateur competition, and these technical rules are intended to limit the cost of racing competitively in the series and help the organization provide a track environment that is safe and consistent. Modifications that exploit loopholes or that present safety issues, as determined by tech inspection and available Board members, may not be allowed to race.

5.2 Finding a class to ride in

Cascadia Supermoto wants you to race! If you bring a motorcycle that meets the minimum restrictions listed, we will find at least two classes for you to ride in.

The class structure has been designed to make sure that every rider has at least two classes available for them, and most should have three. If you cannot find two classes to ride in, please talk to registration or the race directory and they will make exceptions as needed to find you a second class to ride.

5.3 New class proposals

Cascadia Supermoto is open to new classes! If five or more riders wish to create a new class and are prepared to run in it, as long as it meets the general restrictions in Section 5.1, we will add the new class into the schedule immediately. New classes may not grid separately, but they will be scored separately and have their own championship awarded.

5.4 Race Classes

5.4.1 Open

This class is for experienced racers on any motorcycle.

- Unlimited displacement.
- Unlimited modifications within Section 5.1 restrictions.
- Beginner riders are prohibited from entering this class.

You do not have to be a pro to ride this class! This is the class that determines the club #1 plate, and any supermoto rider who has some race experience should be comfortable riding in this class and competing for club #1.

5.4.2 Intermediate

This class is for skilled riders who are not experienced racers, or slower racers who are less comfortable in the Open class, on any motorcycle.

- Unlimited displacement.
- Unlimited modifications within Section 5.1 restrictions.

Riders from the Beginner class are encouraged to race this class as soon as they can. Riders who ride in Open are may not ride in this class..

5.4.3 Beginner

This class is for riders new to competition on any motorcycle.

- Unlimited displacement.
- Unlimited modifications within Section 5.1 restrictions.
- Open riders are prohibited from this class. Riders able to finish in the top 50% of the Intermediate class will be removed from this class.
- If you win a race, you will no longer be allowed to enter Beginner
- No season points or awards will be given in this class

5.4.4 450 Supermoto

- Unlimited modifications within displacement limits and Section 5.1 restrictions.
- Displacement limits of
 - 450cc or less for water cooled four-stroke engines.
 - 300cc or less for two-stroke engines.
 - Unlimited displacement air or air-oil cooled four-stroke engines.

5.4.5 250 / 400 Supermoto

- Unlimited modifications within displacement limits and Section 5.1 restrictions.
- Displacement limits of
 - 250cc or less for four-stroke water-cooled engines.
 - 400cc or less for four-stroke water-cooled engines with 100% OEM rims and brakes (AKA: DRZ-400S).
 - 220cc or less for water cooled two-stroke engines.
 - 480cc or less for air-cooled engines.

5.4.6 Vet 45+

- Riders must turn 45 years old before Jan 1, 2020.
- Unlimited displacement.
- Unlimited modifications within Section 5.1 restrictions.

5.4.7 Vet 30+

- Riders must turn 30 years old before Jan 1, 2020.
- Unlimited displacement.
- Unlimited modifications within Section 5.1 restrictions.

5.4.8 Asphalt-Only

- This class will run ONLY the asphalt portion of the course.
- Unlimited displacement.
- Unlimited modifications within Section 5.1 restrictions.

5.4.9 Minibikes

- Mini classes will run under the Caucasia Mini Endurance Challenge rule book.
- For Cascadia Supermoto, the overall class champion will be determined through combined scoring of all classes.
- Displacement limits:
 - 4-stroke 2-valve air- or air-oil cooled: 250cc
 - 4-stroke 4-valve air- or air-oil cooled: 212cc
 - 4-stroke water-cooled: 150cc
 - 2-stroke air-cooled: 125cc
 - 2-stroke water-cooled: 95cc

6 Supermoto race day schedule and gridding

6.1 Schedule

6.1.1 Gates, registration, and technical inspection

The schedule below is the expected schedule, but may be modified from race to race. A race-day schedule will be available for each race at signup.

Track gates will open **no later than** 0800 on race day. Gates may be open earlier depending on the specific venue.

Race-day registration will open **no later than** 0815. Registration may open earlier depending on the specific venue.

Technical inspection will begin at 0830.

6.1.2 Race day format (approximate)

07:45-0800	Registration Opens
08:10	Tech Inspection Opens
08:50	Rider's Meeting
09:00-10:30	Practice – Slow, Fast, Asphalt (2 sessions each)

10:45	HEAT RACES START
	Asphalt-Only
	Minis
	45+ Veteran
	Intermediate
	30+ Veteran
	250/400 Supermoto
	450 Supermoto
	Beginner
	Open

13:00 to 13:45	LUNCH
-----------------------	--------------

14:00	MAIN RACES START
	Asphalt-Only
	Minis
	45+ Veteran
	Intermediate
	30+ Veteran
	250/400 Supermoto
	450 Supermoto
	Beginner
	Open

16:30	Awards Ceremony
--------------	------------------------

6.2 Mandatory rider's meeting

All riders must attend the rider's meeting held before the first practice of the day. Rider's meetings are held to communicate important information about race procedures and track conditions. Riders who miss the rider's meeting will not be permitted to race.

6.3 Race length

The length of each race may vary from track to track and from race day to race day depending on track length, available time, etc. Race direction will notify riders at the rider's meeting of the race length. Race length may be shortened as needed in order to meet schedule restrictions. Open mains will run at least two more laps than other classes

6.4 Gridding

All classes are subject to the following procedures:

- Riders will be gridded for the main race by heat race finishing order.
- Riders who do not start or finish their heat race will be gridded at the back for the main race in that class.
- Grid sheets will be posted at least 10 minutes prior to the first heat/main. **Riders are responsible for knowing their start order.** Riders who don't know their start order will be sent to the back of the grid.

Grids will be formed using one of two formats, determined each race:

- 1) Riders will be gridded by random draw at registration (pea pick) for their heat race.
- 2) Riders will be gridded in order of practice times (fastest first), split by asphalt and dirt practices.

Rider/crew safety equipment and rules

6.5 Insurance

The Cascadia Supermoto series does NOT provide medical insurance. Each rider and pit crew member must have their own personal medical insurance policy.

6.6 Protective gear for riders

It is the responsibility of the rider to wear adequate safety equipment for competing in a motorcycle race. Technical inspectors and race direction may remove a rider from competition at any time due to insufficient safety equipment. Riders will not be allowed on the track without all required protective gear.

6.6.1 Helmet

Must be full-face (no flip-ups) and certified by the manufacturer, with sticker affixed, to meet SNELL 2010 or newer Snell standard, BSI 6658-A or ECE 22-05. No significant scratches or evidence of impact allowed.

6.6.2 Eye protection

Shatter-resistant eye protection is required (ANSI z87 or better are recommended); either goggles, safety glasses or a face shield.

6.6.3 Gloves

Gloves must be leather or designed for asphalt/road use. Lightweight motocross gloves are not acceptable.

6.6.4 Boots

Heavy boots designed for riding that cover the ankles. MX, Supermoto, or road racing boots are strongly preferred. Boots must buckle or lace, no 'slip-on' boots.

6.6.5 Spine protection

Adequate spine protection is required. A hard clamshell-style back protector is preferred, but CE-rated foam back pads may be allowed if large enough.

6.6.6 Abrasion protection

Full-coverage abrasion protection for the body, including:

- Abrasion-resistant pants, either leather or synthetic. Jeans or heavy canvas are not sufficient protection and will not be allowed unless they have motorcycle-specific abrasion protection (i.e. Draggin' Jeans, etc) and are worn with armor. Motocross pants are allowed with knee armor but not encouraged.
- Abrasion-resistant jacket or upper body covering. Jerseys or sweatshirts alone are not sufficient; armor must be worn underneath.
- Two-piece synthetic riding suits (Aerostich, Hein Gericke, Motoport, etc) are allowed.
- Race leathers, either one-piece or two-piece zip-together leathers, are strongly encouraged.
- No skin should be visible below the rider's neck. Riders should make sure their protective equipment fits before riding.

6.7 Protective gear for pit crew members and staff

Any person working on the racetrack when it has been declared hot must wear the following:

- Shirt
- Long pants
- Close-toed shoes

Gloves, eye protection, and a long-sleeve shirt are strongly recommended for corner workers and any pit crew member in hot pit. **Red clothing is not permitted for corner workers, on-track officials, or anyone else on or around the racetrack.**

7 Technical requirements

7.1 Technical inspection

Every motorcycle must be certified for racing by the race day technical inspector before being allowed on the track. The tech inspector will mark each motorcycle as approved after examination, or will tell the racer how to make their motorcycle ready to race.

If a motorcycle cannot be made ready to race prior to the start of racing, it will not be allowed on the track and the racer will be refunded their entry fees for that day.

Technical inspectors have final say on whether or not a motorcycle meets technical requirements and is safe to race. Arguing with the technical inspector is not allowed, and may result in other penalties, up to or including ejection from the event, at the discretion of race direction.

7.2 Technical requirements for racing motorcycles

Motorcycles must meet the following technical requirements to be allowed on the track.

7.2.1 Race numbers and scoring

Race numbers 1-5 are reserved for the top 5 ranked riders in the Open Supermoto class.

All motorcycles must have race numbers, and numbers must be clearly visible from both sides and the front. If a number cannot be read by scoring during the race, the motorcycle will not be scored.

Low-contrast number colors (i.e. blue on black) will be rejected by tech inspection. Illegible fonts will be rejected by tech inspection.

If a motorcycle's numbers cannot be made legible, the race director and scoring may require the rider to wear a uniquely-colored jersey or vest over their protective clothing, to be provided by tech.

7.2.2 All motorcycles and scooters

- No visible oil or fluid leaks.
- Oil drain bolts must be secured with safety wire.
- Oil fill plugs must be secured with safety wire or a safety clip.
- External oil filters must be securely safety wired using a hose clamp around the body of the filter with safety wire to a hard point on the engine or chassis.
- Oil filter cover bolts for internal oil filters must be safety wired or tightened and secured with a dab of silicone sealant.
- Foot peg sliders are required for any motorcycle with foot pegs. Foot peg sliders should be hard, smooth plastic. Metal sliders and fabric wraps are not acceptable.
- The throttle must operate smoothly with a positive return to idle when released, meaning the throttle snaps back to idle immediately.
- The motorcycle must have an operational kill switch.
- Proper front brake operation and tight bolts.
- Proper rear brake operation and tight bolts.
- Only water and Water Wetter and VP Stay Frosty Coolant are allowed as coolants for water-cooled motorcycles. No glycol-based coolants of any kind will be permitted. **Engine Ice is not permitted.**
- Vent and overflow lines for oil and fuel (NOT coolant) must be routed to an appropriately-sized catch can or cans, at least 4oz in size. Catch cans must be made of metal or plastic, no glass or paper catch cans are permitted.
- Tires must be in good condition as judged by the technical inspector.

- Any lights or turn signals must be taped over completely.
- All motorcycles must be in a safe, ready-to-race condition as determined by the technical inspector. This means no loose bolts, loose parts, loose chains, or any part or defect on the motorcycle that the inspector believes may present a safety hazard.

7.2.3 Equipment removal

The following equipment **must** be removed from all motorcycles:

- Mirrors
- Tool kit
- License plate and bracket
- Center stand

It is recommended that these be removed from all motorcycles:

- Headlight
- Reflectors
- Turn signals
- Tail light and assembly
- Horn
- Side stand and center stand

7.2.4 Additional requirements for full size motorcycles

- Front and rear axle sliders are required.
- Bar end sliders or other bar-end protection is required. Heavy-duty handguards or bark busters such as Cycra ProBend, Fastway FIT, etc. are strongly recommended. Motorcycles not using heavy-duty handguards will be evaluated on a case-by-case basis for adequate protection.
- Any motorcycles with kickstands that are inside the line of ground impact (DRZ-400, Honda XRs, etc) must have those kickstands removed. Kickstands that do not pose an impact risk (Beta, KTM, Husqvarna) must be retained by safety wire in the raised position. If in doubt, the kickstand should be removed.

7.2.5 Additional requirements for minibikes and scooters

- For minibikes, please refer to the Cascadia MiniMoto technical requirements.

8 On-track procedures for Supermoto and sprint races

8.1 Pre-race staging and gridding

For heat races, riders will draw a numbered token from a bag for each race the rider has entered during registration. Each racer will assign a token to each race. Races will be gridded in order of tokens assigned to the race. This is also known as a ‘pea pick’. Grids will be posted before heats and mains. Grid spaces will be numbered.

Riders may alternatively be gridded by a qualifying procedure based on practice times (see above)

Riders should know their posted grid position and line up in that position. If there is a conflict over a grid position, both riders start from the back of the grid.

8.2 Starting

Once gridded, the starting official will point to the racers. If a racer is having a problem, they should get the attention of the official by raising and waving a hand. Racers will be allowed two minutes to remedy the problem. After two minutes, the rider will be instructed to exit the track and the race will start without them.

After the starting official has pointed to each racer and confirmed they are ready to race, the official will move off the track and point to the starter or starting light.

When starting with a flag, the moment the tip of the green flag leaves the ground or the starter's hand is considered to be the start of the race.

When starting with a light, the moment the green light is lit is considered the start of the race.

Race officials will be watching for any jump starts. If a rider jumps the start, all other riders must continue to wait for the actual race start, and must proceed with the race as soon as the green flag is thrown. Do not wait for the starter to restart the race.

If a rider jumps the start, they should attempt to correct the problem themselves by quickly re-setting (if the race has not started) or by slowing to negate the advantage gained from the jump start. If the rider does not, they will be penalized by race direction after the race, or race direction bring out the red flag and will proceed with a re-start if the jump start is a safety risk.

8.3 Entering and exiting the track

During supermoto/sprint races, the pit area is considered "cold" and not part of the racing surface. Riders must ride carefully and slowly in the pit area.

Track entrance procedures will vary from track to track depending on pit configuration. **Information on track entry and exit procedures will be reviewed during the rider's meeting.**

When exiting the track when racing or practice is ongoing (hot track, green flag condition), riders should raise their left hand or indicate with a raised leg two corners before the pit entrance. Riders should stay off the racing line in the last corner before entering the pits and begin gradually slowing prior to exiting the track. Once on pit lane, riders should slow to walking speed when traveling through the pits.

8.4 At the end of a race or practice

After crossing the finish line when the checkered flag is displayed during a race or practice, riders should continue at race pace through the next corner, then slow gradually and proceed around the circuit to pit exit. Riders should not cut the course OR take a “victory lap”. Riders must not slow or stop at the finish line; this is an extreme safety hazard and will result in a penalty.

8.5 Passing

The passing rider has the responsibility to make the pass clean and safe. Rubbing is not racing.

Slower riders being passed should hold their line. Moving over for a passing rider is a risky move that may cause an accident; it is the passing rider’s responsibility to safely make the pass.

Riders in competition are not expected to give up positions to other riders, but line changes intended to block significantly faster riders and aggressive or dangerous block passing may result in penalties from race direction or a black flag when seen as unnecessarily rough. We all have to go back to work on Monday, so don’t be a jerk.

8.6 Accidents and debris

When a crash occurs in front of a rider and there is debris, oil, or a rider still on the racing surface, the observing rider should slow down and wave a hand or extend a leg to alert riders behind them, but should not stop on the track. Stopping on the track is prohibited and can cause another crash – corner marshals or medics will assist the downed rider(s). Riders should continue racing or practice until a red flag is displayed. **Passing is not allowed near a downed-rider incident, whether or not a yellow flag has been displayed yet.**

8.7 Flags

Green Flag: Used to signal a live track and also used for starts.

White Flag: Used to signal the final lap of the race.

Checkered Flag: Used to signal the end of a race. Races are not over until either the checkered flag or red flag is displayed.

Red Flag: Used to stop an event before the race is over due to a hazard. Riders must slow down immediately but safely, raise a hand or extend a leg to acknowledge that they have seen the red flag, and return to pre-grid. See Section 8.8 for scoring rules after a red flag and restart procedures.

Yellow Flag: Used to signal riders to use caution, that there is an unusually hazardous situation on the track. Riders **must not** pass on a yellow flag (**waving or still**) until the hazard has been passed. Riders passing under a yellow flag (**waving or still**) will be penalized finishing positions at the discretion of race direction. Riders may resume racing after the hazard has been passed.

Black Flag: Corner workers or the race director will wave the flag while pointing at the racer in question. The indicated rider should immediately and safely pull off the racing surface, away from any impact zones, and talk to the nearest race official. This flag is used to signal a rider of a safety violation or disqualification. This could include mechanical problems, leaking fluid, or riding that race direction considers dangerous or unsportsmanlike. When shown the black flag, the racer must remain trackside or in the pits until race director addresses the situation. If the racer chooses to come back to the pits and speak to an official they must not cross the racing surface. If a rider ignores a black flag, they will forfeit the race, be marked as DNF by scoring, and may face other penalties at the discretion of race direction.

8.8 Race restarts and red flags

When a red flag is displayed, riders should slow down immediately but safely and return to the starting line grid or to the location instructed by race officials at start/finish or the pit entrance. If the race is less than 50% complete it will be re-started with a reduced number of laps, if the race is over half way then the race is scored as complete and the riders will be scored based on the last lap before the incident. The rider race direction determines to be the cause of the incident will start from the back of the grid in the event of the restart. If the race is declared complete the rider causing the red flag will be scored last of all bikes still circulating on the last lap scored.

9 Points and scoring for Supermoto/sprint races

9.1 How points are scored

Sprint and Supermoto racing uses a two race format, one heat race and one main race per class.

Points and trophies are awarded based on main race finishing position.

Riders must complete a full lap of both the heat race and main race to be scored for an event.

9.2 Points by main race finishing position

Finishing Position	Points
1	25
2	21
3	18
4	15
5	12
6	10
7	8
8	7
9	6

10	5
11	4
12	3
13	2
14	1
15+	0

9.3 Scoring for wet events

Wet events are awarded 1.5x points of dry races. A race is wet when declared so by the race director.

9.4 Season championships

End of season championships in each class will be awarded to the rider who scores the most points during the season. In the event of a points tie, the winner will be the rider with the most races won during the season. In the event of a points tie and won races tie, the winner will be determined by the number of heat races won during the season.

The top 5 riders in the Open Supermoto class will have the option of using their championship ranking as their race number in the following season.

10 Rider code of conduct

Riders will conduct themselves in a sportsmanlike manner at all times on and off the track. Violations of the rider code of conduct are subject to penalties as described below.

10.1 On the track

Riders must ride in a responsible manner which does not cause danger to other competitors or participants, either on the track or in the pit area. Any infringement of this rule may be penalized.

Grievances related to rough riding, on-track incidents, or unsportsmanlike behavior should be reported to race direction. Unless otherwise witnessed by race officials or reported to race officials, on-track incidents are assumed to be racing incidents and will not incur any penalties for involved riders, except as noted elsewhere for incidents that result in a red flag.

10.2 Off the track

The rider is ultimately responsible for the actions of themselves, their pit crew, family, and friends at the track. Misbehavior by any of these may result in a penalty given to the rider.

10.2.1 Rider and crew behavior

Fights, verbal abuse, bullying, or violence of any kind between competitors or spectators, or towards Cascadia Supermoto staff, will not be tolerated. Any acts of abuse, bullying,

or violence observed during an event are grounds for immediate ejection from the premises and a lifetime ban.

10.2.2 Harassment policy

Cascadia Supermoto is dedicated to providing a harassment-free event for everyone, regardless of gender, gender identity and expression, sexual orientation, disability, physical appearance, body size, race, age or religion. We do not tolerate harassment of event participants or spectators in any form. Event participants violating this policy may be subject to penalties described in the penalties section of the rulebook. If anyone – including riders, spectators, volunteers, or staff – makes you or anyone else feel unsafe or unwelcome, please report it as soon as possible to the chief officer or race director.

10.2.3 Pets

The track is not a pet-friendly environment, please think twice before bringing your animals. **Pets must be kept on a leash at all times**. Pet owners are responsible for controlling their pet's behavior at all times. Aggressive animals and pet owners who will not comply with leash policy will be asked to leave the track.

10.2.4 Intoxicants

INTOXICANTS OF ANY KIND ARE NOT PERMITTED IN THE PITS DURING THE RACE. Racing is considered ongoing until the last race of the day is complete and the track is “cold”. Riders and any crew or staff may not use intoxicants of any kind before or during racing. Riders found to be under the influence will be immediately disqualified and may be ejected from the venue. A second offense will result in a lifetime ban from Cascadia Supermoto events.

10.2.5 Pit riding

PIT SPEED LIMIT IS 5 MPH AT ALL TIMES WHEN RIDING IS ALLOWED IN THE PITS.

Riding is not allowed in cold pit at all venues.

10.3 Penalties

Penalties for violation of the code of conduct include:

- Docking of one or more positions in a race
- Race disqualification
- Event disqualification
- Immediate ejection from the event
- Suspension from one or more future events
- A lifetime ban from participating in Cascadia Supermoto events

Penalties will be determined by race direction or, in the event of a suspension or ban, the Cascadia Supermoto Chief Officer. The Chief Officer has the final word - there is no appeals process.

11 Who's who at the track

Cascadia Supermoto racers should know basic information about the structure of the organization and who to go to at the track when they need information or have a problem.

NOTE: ALL Cascadia Supermoto staff members carry portable radios; when in doubt, talk to a staff member and they'll get you the help you need.

11.1 Chief Officer

The chief officer is the person in charge of the event overall. In a dispute, their word is final. They've got authority over every aspect of the race, and have the ability to grant refunds, exceptions, modify rules, eject participants, etc.

11.2 Race director

The race director is in charge of the actual racing. They are responsible for on-track rule enforcement, technical enforcement, flagging during the race, managing corner marshals, and the racing schedule throughout the day. The race director's chief concern is the safety of all of the riders and spectators throughout the event, and they have authority over anything happening on the racetrack. Once racing has started, talk to the race director about any problems gridding, if you are not going to be able to make a race, or if there is a safety issue with the track.

11.3 Registration

Registration handles getting riders registered for classes, annual memberships, contingency signups, and any paperwork that riders need to fill out in order to race. Find registration to discuss any problems with classes and entries, or for a refund/credit if one is needed.

11.4 Starter (aka pre-grid)

The starter and pre-grid manager is responsible for making sure that races start on time, that riders are properly gridded when they line up for the start of a race, for flagging the start-finish line during the race, and for ending the race with the checkered flag.

11.5 Technical inspector

The technical inspector is responsible for inspecting all racing motorcycles for mechanical problems and for making sure that riders have adequate protective gear on when entering the track. Any motorcycles having mechanical problems that pose a safety risk should be reported to the technical inspector.

11.6 Timing and scoring

Timing and scoring is responsible for scoring riders, tracking rider finishing positions, and producing grids for Moto 2 races based on rider finishing positions in Moto 1. Riders don't usually need to talk to timing and scoring, unless they'd like to volunteer! The chief officer or race director should handle most scoring issues instead.

11.7 Corner marshals

Corner marshals work in teams of two out on the track to display flags for riders and assist riders in the event of an incident. Corner marshals are out on the race course, so

racers won't be able to talk to them unless they crash. Try not to do that! Please thank your corner marshals at the end of the race; they are volunteers and we couldn't race without them.

11.8 Medic/EMTs

The medic or EMTs on site are there to look after riders injured during the event, on or off the track. Hopefully, these folks stay very bored through the entire event. If somebody is injured and needs help, talk to somebody on the Cascadia Supermoto staff with a radio to get medical help quickly. Please don't call 911 unless directed to by staff.

12 Rule Book Updates

Cascadia Supermoto reserves the right to revise this rule book at any time. Revisions after the season starts will be carefully considered and will typically address clarifications, situations that affect rider safety, or changes required to assure racing is completed during the time the track is rented for. Any revision will become effective immediately and posted to the Cascadia Supermoto website.

13 Disclaimers

***WARNING:** Motor vehicle mishaps, in competition or otherwise, can result in injury or death. Motorcycle racing is a dangerous activity. Participants are solely responsible for their safety.*

The rules and/or regulations set forth herein are designed to provide for the orderly conduct of racing events and to establish minimum acceptable requirements for such events. These rules shall govern the condition of all events, and by participating in these events, all participants are deemed to have complied with these rules. NO EXPRESS OR IMPLIED WARRANTY OF SAFETY SHALL RESULT FROM PUBLICATION OF OR COMPLIANCE WITH THESE RULES AND/OR REGULATIONS. They are intended as a guide for the conduct of the sport and are in no way a guarantee against injury or death to any participant, spectator or official. The chief officer and/or race director shall be empowered at any time to permit deviations from any specifications herein or to impose any further restrictions or changes that in their opinion do not alter the minimum acceptable requirements. NO EXPRESSED OR IMPLIED WARRANTY OF SAFETY SHALL RESULT FROM SUCH ALTERATION OF SPECIFICATIONS. Any interpretation or deviation of these rules is left to the discretion of the officials. Their decision is final.
